2142

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-45 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-45 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 04 March 2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

1. This office action is in response to Application filed 03/04/2003. Claims 1-45 are pending. The rejection is cited as stated below.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-45 are rejected under 35 U.S.C. § 103 as being unpatentable over Khalil et al [Khalil 6,430,698 B1] in view of Pickett [6,154,465].

3. As per claims 1,9,18,26,36,42 Khalil discloses a dynamic network address registration system [Khalil, dynamic home agent discovery resolution, registration request and replies, col 3 line 59-col 4 line 21], comprising:

a first device; a second device, said first device and said second device adapted to communicate via a communications network [Khalil, the mobile nodes, Internet and home agent, Fig 9-11, col 7 lines 25-35]; and

a controller coupled to said communications network, said controller adapted to store address information for said first device therein, said controller adapted to store address information for said second device therein [Khalil, home agent's IP addresses, col 7 lines 37-col 8 line 24], said controller further adapted to provide said address information of said second device to said first device such that a communication path can be efficiently established between said first device efficiently communication [Khalil, col 6 line 63-col 7 line 13] and said second device which is equivalent to a address

Art Unit: 2142

management circuit [Khalil, home agent with dynamic home agent address resolution algorithm, col 7 lines 37-67] and

However Khalil does not explicitly detail the operation includes a search engine for searching source and destination addresses, static or dynamic, for the internetworking devices.

In the same endeavor, Pickett discloses a VPN or Internet environment using the connection manager and search parameters to establish an efficient channel [Pickett, VPN, col 35 line 40-col 36 line 25; connection manager, search parameters, col 43 lines 25-52; efficient channel, col 44 lines 25-45]

Therefore it would have been obvious to an ordinary skill in the art at the time the invention was made to incorporate the search engine or search parameters as taught by Pickett into the Khalil's apparatus in order to utilize the dynamic home address resolution algorithm. Doing so would provide efficient communications over virtual network.

4. As per claims 2,14,19, Khalil-Pickett disclose said communication path is efficiently established between said first device and said second device without requiring said first device and said second device to have static addresses as a design choice.

5. As per claims 3,15,20,32,38 Khalil-Pickett disclose said controller is adapted to establish a virtual private network (VPN) between said first device and said second

device via said communications network such as Internet as inherent feature of IP address.

6. As per claims 4,21,37 Khalil-Pickett disclose said first device, said second device, and said controller are further adapted to be coupled to a second communications network [Khalil, home agent is a router included NAT, col 1 lines 48-55. It was obvious the router connected to a second network].

7. As per claims 5,10,22,27 Khalil-Pickett disclose said controller is adapted to inform said first device, via said second communications network, as to whether or not said second device is coupled to said communications network as a design choice.

8. As per claims 6,12,23,33 Khalil-Pickett disclose said controller is adapted to instruct said second device, via said second communications network, to couple to said communications network [Khalil, Internet, Fig 11].

9. As per claims 7,16,24,34 Khalil-Pickett disclose said communications network is the Internet or WAN [Khalil, Internet, Fig 11].

10. As per claims 8,17,25,35 Khalil-Pickett disclose said second communications network is a circuit switched network [Pickett, ISDN, col 12 lines 13-35].

11. As per claims 28, 29 Khalil-Pickett disclose said communication network includes an integrated services digital network (ISDN) basic rate interface (BRI) for connectivity to a wide area network and an always on dynamic ISDN feature is supported for said ISDN BRI; said network devices are adapted to establish a network connection via a D channel of said ISDN BRI and receive an assignment of a dynamic network address which said network device then provides to said dynamic network address registration system via a B channel of said ISDN BRI as a design choice of internetworking devices [Pickett, ISDN, col 12 lines 13-35].

12. As per claims 30-31 Khalil-Pickett disclose said network devices is a router; said network devices is a NAT [Khalil, home agent is a router included NAT, col 1 lines 48-55].

13. As per claim 39, Khalil-Pickett disclose said communication frame analysis component determines if a communication frame includes information to be mapped in said address mapping component [Khalil, home agent is a router included NAT, col 1 lines 48-55].

14. As per claim 40, Khalil-Pickett disclose said communication frame analysis component determines if a communication frame is requesting information from said address mapping component; said communication frame analysis component extracts

Art Unit: 2142

information identifying a desired location from a communication frame as inherent feature of router.

15. As per claims 43-45 Khalil-Pickett disclose storing in said dynamic network address registration system information regarding the association of a device and a dynamic network address assigned to said device; forwarding to said network device a network address associated with dynamic network address registration system; polling said dynamic network address registration system to determine if there are updates to information regarding a registered dynamic address such as router [Khalil, home agent is a router, col 1 lines 48-55; dynamic home agent discovery resolution, registration request and replies, col 3 line 59-col 4 line 21].

Thus, as explained above, the system and method of claims 1-45 is anticipated by the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Thong Vu, whose telephone number is (571)-272-3904. The examiner can normally be reached on Monday-Thursday from 8:00AM- 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Rupal Dharia*, can be reached at (571) 272-3880. The fax number for the organization where this application or proceeding is assigned is 703-872-9306

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval IPAIRI system. Status information for published applications may be obtained from either Private PMR or Public PMR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
